EDUCATION

- AI Generalist**
Outskill — Dec 2025
- Project Management Professional**
Skillsoft
- BSc (Hons), Mechanical Engineering**
University of Ibadan — 1995–2001

IMPACT HIGHLIGHTS

- 40–80% manual workload reduction for SME clients
- 70% faster response times via AI support assistants
- 36-actor Apify automation portfolio shipped
- 17 microservices in production on Railway

PROFILE

AI Automation & Digital Transformation Consultant with a 16+ year foundation in production planning, maintenance operations, and cross-functional coordination across aviation and industrial environments — now fully specialised in AI-driven workflow automation, CRM systemisation, and process design for growing service businesses. Combines enterprise-grade planning discipline with hands-on, no-code/low-code build experience across n8n, Zapier, Make, and API integrations. Runs Prime Automate Systems, an AI automation consultancy serving local service businesses (\$15K–\$100K/month), and independently designs, builds, and ships automation-driven software products end-to-end. Seeking remote consultancy engagements where systemisation and applied AI translate directly into measurable operational efficiency.

CONSULTING & VENTURE EXPERIENCE

Founder & AI Automation Consultant — Prime Automate Systems 2025 – Present

- Deliver AI automation and digital transformation consulting to local service businesses (\$15K–\$100K/month revenue) within a 50-mile radius, covering workflow automation, CRM pipelines, and AI assistants.
- Reduced manual workload by 40–80% for SME clients through custom-built automation systems; built AI customer support assistants that increased response speed by 70%.
- Designed automated client onboarding, scheduling, and multi-stage CRM workflows that improved lead conversion; built primeautomatesystems.com with a full SEO content strategy and n8n content pipeline for inbound client acquisition.

Independent Systems Builder — SaaS, API & Automation Portfolio 2025 – Present

- Designed and shipped a 36-actor Apify automation portfolio (creator handle: conceivable_extension), including full PRDs, monetisation structures, and RapidAPI wrapper specifications; became a verified creator on the n8n Creator Portal selling paid workflow templates as a secondary distribution channel.
- Architected BeeHIV, a seven-layer algorithmic trading system; delivered and tested Layers 1–4 (594/595 automated tests passing) with ML-based strategy optimisation across five financial instruments.
- Built and launched ClearChoiceTools.com and Rendict.com — live affiliate/content platforms with automated n8n content pipelines (Rendict: 72 articles across five categories); operate 17 API microservices on Railway alongside Supabase and GitHub/Vercel CI/CD, using Claude Code as a primary AI-assisted development tool.

PROFESSIONAL EXPERIENCE — PLANNING & OPERATIONS LEADERSHIP

Production Planner — Marshall Aerospace (UK) 06/2023 – Present

- Manage production schedules end-to-end, identifying resource constraints, risks, and opportunities to protect schedule performance across concurrent maintenance projects.
- Develop task-level schedules feeding an ERP system, translating operational requirements into controlled, executable work.
- Coordinate stakeholder interfaces across operations, customer support, and stores to ensure timely bill-of-materials delivery, and drive continuous-improvement initiatives to strengthen baseline planning processes.

Production Planner — Abu Dhabi Aviation 11/2021 – 05/2023

- Coordinated base-maintenance inspections as CAMO delegate, supporting fleet continued airworthiness and operational readiness.
- Integrated fleet-type engineers, stores, CAMO, and Part 145 teams to keep multi-stakeholder projects on schedule.

Deputy Supervisor, Maintenance Planning — Caverton Helicopters 05/2013 – 10/2021

- Chaired cross-functional planning meetings and owned purchase-requisition workflows within the maintenance management system, supporting proactive fleet airworthiness.
- Developed and maintained forecasting and workflow processes that improved forward planning accuracy; applied EASA, FAA, and NCAA regulatory frameworks throughout.

ADDITIONAL EXPERIENCE

Airworthiness Engineer — Caverton Helicopters	01/2012 – 04/2013
Planning Engineer — Arik Air	11/2008 – 12/2011
Planning Engineer — Overland Airways	06/2007 – 10/2008
Project Manager — Devtek Contracts	12/2006 – 05/2007
Project Supervisor — Balakhany Nigeria	03/2003 – 07/2005
